Introduction to music appreciation and history. O vi,137p il $1.50 '23 Ditson 24-3082
Designed for laymen and university extension students it gives in non-technical language and readable style a concise sketch of the history of music from its primitive origins to the present day. It also gives help in understanding something of the structure and form of music together with an appreciation of its content. Contains numerous illustrations, pictorial and musical. Adopted for use by the Division of university extension in Massachusetts. Equally valuable for use by classes in any educational institution, or for individual study.—Adv.

The forcefulness of the book is its simplicity. It is not ridden with psychology or involved with technical terms. The author writes not as a theorist but as an expert performer. His complete mastery of the subject through experience is revealed by his simple, unostentatious presentation of principles of great professional value in every-day language that the layman can understand. Dealing with the fundamental principles, full of the "what" and the "how" to do, the book might well be called a "manual" yet each idea is fully developed. Its brevity will be a source of great satisfaction and economy to the "busy man."—Adv.

The diary kept by Lord Northcliffe during his famous journey round the world in 1921-22, edited by his two brothers, Cecil and St John Harmsworth. It was during those two years that questions of more than national importance arose, in regard to which Lord Northcliffe was called upon to take a leading part. It is of the greatest interest to read in his own words his graphic descriptions of a world journey in many ways exceptionally important and productive of a rich store of knowledge and wisdom. His immediate impressions, jotted down on train and liner, the book reveals the personality of the great journalist more clearly than any biography. His varied comments on people and places show a mind of the swiftest perceptions.—Adv.

A23-2056

This is the story of the first white man to cross our continent, told by himself. His narrative, newly translated, is now made accessible to the general reader for the first time. It is a story of shipwreck and battle, of captivity, strange adventures and extraordinary experiences among the Indians. Nearly a hundred years before the Pilgrim Fathers landed at Plymouth, Alvar Nunez journeyed from the Atlantic to the Pacific coast. The overland journey began at some point west of the Mississippi and traversed the state of Texas and the northern part of Mexico. It is acknowledged that through him the first knowledge of the buffalo reached white men, and his description of the hunchbacked cows, while brief, is accurate.

The first edition of the work was published in 1542 and is of extreme rarity, rendering it unavailable to the general reader.—Adv.

The reprints brought together in this volume contain the most telling arguments on both sides of the question, and give the reader an opportunity to understand the contentions of the foremost leaders on either side. Like the other volumes in the Handbook series it contains a debater's brief, and a selected bibliography on each side of the question.
The book is of interest to all who want to know in what direction we are drifting.—Adv.

A picture of Robert Louis Stevenson by his stepson which is fresher and more personal than any other. The two lived and worked together from Stevenson's twenty-sixth year to his death at forty-four. It goes without saying that Lloyd Osbourne knew Stevenson more intimately than any one else who has written about him. His recollections and impressions show us a thoroughly human Stevenson. The picture of the last hours of Stevenson on earth and the account of his burial on the lofty top of Mount Vaea by the native Samoans "under the wide and starry sky" is touchingly beautiful.—Adv.

The confession of a man who after years of turbulence and atheism has turned to the simple faith of Christ. Giovanni Papini is the foremost man of letters in Italy, he has been hailed as a master by Bergson, and was a friend and disciple of William James. Papini cuts away the layers of embellishment and ceremony with which literature, theological systems and skeptical critics have obscured the picture of Christ's life and times, and he writes with a simplicity that makes the story clear to every mind and with a burning passion that brings it home to every heart.—Adv.

The Spirit of America by Angelo Patri, Principal of P. S. 45, Bronx, New York City, is the first of a series of inspirational Civic readers for the elementary schools. Rarely is there found an author so well qualified for a work of this kind as Mr Angelo Patri. The task he set himself of interpreting America to the thousands of elementary school children of the United States, both those of alien parentage and the sons of native sons, called for an unusual amount of understanding and sympathy. To write interestingly about our institutions, to logically set forth the superiority of our form of government is comparatively easy—but to reveal successfully the spirit of America calls for genius. Those who have read the books in the making, grown-ups though they be, have felt the thrill, have felt the force of the emotional appeal, and have without exception pronounced it a book that is destined to become a classic in children's literature.—Adv.

Guide for the greedy, by a greedy woman; being a new and rev. ed. of The feasts of Autolycus. D xxxii,179p bds $2 '23 Lippincott [6s Lane] 24-3191

A feast of good reading about good eating. For the gourmet of belles lettres here is a veritable romance of cookery, "a guide to the beauty, the poetry that exists in the perfect dish even as in the masterpiece of a Titian or a Swinburne." Its enticing, alliterative chapters, The triumphant tomato, The magnificent mushroom, The simple sole, etc., are spiced with delicious charm and humor. What Walton's "The compleate angler" is to the art of fishing, Mrs Pennell's volume is to the excellent art of cookery.—Adv.

César Franck, the great genius who gave to absolute music in France its most enduring impetus, and who founded and vitalized a whole splendid school of famous composers, did not neglect the piano, the instrument which received from Beethoven its cachet of nobility. Franck's piano compositions are not only of the highest beauty, but are permanent contributions to the history of the art, in that he invented new forms, or adapted old ones to modern uses. His pupil and devoted disciple, Vincent d'Indy, contributes a biography of compelling human interest, with many entertaining side lights on musical life in Paris, and it has abiding critical value. This preface of Mr d'Indy (in French and English) is undoubtedly a most important accession to musical biographies.—Adv.

Deportations delirium of nineteen-twenty; a personal narrative of an historic official experience; with introd. by Moorfield Storey. D xiv,338p $1.50 '23 Kerr 24-356
Mr Post was assistant secretary of labor during the Wilson administration, and resisted A. Mitchell Palmer's attempts to deport illegally thousands of alien wage-workers guiltless of any offense against this country's laws. This book is a vivid story of a sinister attack on the personal rights guaranteed by the Constitution.—Adv.

From immigrant to inventor. O 396p il $4 '23 Scribner 23-13553
Mr Pupin, professor of electro-mechanics, Columbia university, unfolds in this story of Americanization, the dramatic career of the Serbian immigrant who arrived in this country with five cents in his pocket, worked in a cracker factory, earned his way to and through Columbia university, took honors there and in European universities, and became one of America's leading scientists. The author's literary gift, his ability to stir the reader's emotions, his appreciation of all that America stands for, make his book as interesting as it is scientifically important. Here for the first time is unfolded for the general reader the growth of the electrical idea from the dream of Faraday to the marvels of wireless and radio.—Adv.
